

Request for ROHS certificates

Geert Huggers - 2019-12-10 - Request for ROHS certificates

We have a new global website and this new global website has also a way to download RoHS certificates.

For instance you need the RoHS certificate from the 9841.

First go to the website: <https://catalog.belden.com/>

Then type 9841 in one of the white search bars. The 9841 will appear.

Click on 9841 and extra information will be shown.

The screenshot shows the Belden Online Catalog website. The page title is "9841 - Industrial Protocol / ...". The main content area displays the product "9841 - RS-485, (1 pr) 24 AWG (7x32) TC, PE/PVC, Foil+TC Braid Shld, CM, 120Ω". The product description is: "One 24 AWG pair stranded (7x32) tinned copper conductors, polyethylene insulation, twisted pairs, overall Beldfoil® (100% coverage) + tinned copper braid shield (90% coverage), 24 AWG stranded tinned copper drain wire, PVC jacket". There are two buttons: "Request Quote" and "Request Sample". Below the product description, there are links for "Compare", "Data Sheet", "Add To", and "Share". The "DOCUMENTS" link is highlighted with a red arrow. Below the "DOCUMENTS" link, there is a "RoHS Documentation" section with a "Date: 2004-01-01" and a "Download" link. There is also a "Capability Bulletin" section with "Belden Classics" and a "Download" link. The "Catalog" logo is visible at the bottom of the page.

Then click on the text "documents" (given in blue) and extra documents will be shown.

Now you are able to download the RoHS document.
