

Request for ROHS certificates

Geert Huggers - 2019-12-10 - Request for ROHS certificates

We have a new global website and this new global website has also a way to download RoHS certificates.

For instance you need the RoHS certificate from the 9841.

First go to the website: <https://catalog.belden.com/>

Then type 9841 in one of the white search bars. The 9841 will appear.

Click on 9841 and extra information will be shown.

The screenshot shows the Belden Online Catalog website. The browser address bar displays https://catalog.belden.com/index.cfm?event=pdf&p=PF_9841. The page header includes the Belden logo and 'Online Catalog'. A search bar contains the text '9841 - Industrial Protocol / ...'. The left sidebar lists various product categories such as 'Wire & Cable (5779)', 'Electronic Wire & Cable (1024)', and 'Networking & Data Cable (463)'. The main content area features the product title '9841 - RS-485, (1 pr) 24 AWG (7x32) TC, PE/PVC, Foil+TC Braid Shld, CM, 120Ω' and a detailed description: 'One 24 AWG pair stranded (7x32) tinned copper conductors, polyethylene insulation, twisted pairs, overall Beldfoil® (100% coverage) + tinned copper braid shield (90% coverage), 24 AWG stranded tinned copper drain wire, PVC jacket'. There are 'Request Quote' and 'Request Sample' buttons. Below the product information, there are tabs for 'DETAILS' and 'DOCUMENTS', with 'DOCUMENTS' selected. Under 'DOCUMENTS', there are two sections: 'RoHS Documentation' with a 'Date: 2004-01-01' and a 'Download' link, and 'Capability Bulletin' with 'Belden Classics' and a 'Download' link. Red arrows point to the 'DOCUMENTS' tab and the 'Download' link for the RoHS Documentation.

Then click on the text "documents" (given in blue) and extra documents will be shown.

Now you are able to download the RoHS document.
